
MAKING
INNOVATIONS HAPPEN

ENHANCING
VALUES.

WHAT IS
OUR ASPIRATION?
**SECURING YOUR
PROFITABILITY.**

In more than 110 years of our company's history, we have consistently made high-quality products. We have reached the top through competence, hard work and quality. Today we are the world's leading specialist in the manufacturing of spacer fabrics. Our customers and business partners know they can fully rely on us.

We will continue to follow this path in the future. We want to position ourselves in new areas of business as a development partner to our customers and to add value to their products through our innovations. We currently partner with customers in developing innovative, highly successful products. We wish to extend our activities to sectors beyond the automotive industry – to producers of technical products for different industrial applications.

As a partner, we see ourselves working with customers at a very early stage in their product creation phase, thereby partnering with them in creating something new. With the customer, we can then achieve solutions which add value to their products and strengthen their market position.

HOW DO WE CREATE
INNOVATIONS?

**AS A TEAM,
PARTNERING WITH YOU.**

Customers work with us in close and trustful relationships because we are at our best as a development partner. We become involved at a very early stage in the development of a new product, bringing ideas and generating value. In a team. Partnering with you.
